Odontheon

Dental technology by Dr. Muhammad Asad Khan, BDS

DENTIST / CLINIC GUIDE

Run your clinic tools with one account

A clear path from first sign-in to Appointments, charting, billing, imaging, and teaching tools — without confusing websites, EXEs, and soft-preview products.

AUDIENCE
Dentists, clinic owners, staff

What this guide covers

1. One account, three surfaces
2. Five-minute dentist start
3. Appointments (map + calendar)
4. DentalCare Pro & Finance
5. AI History Taking & CBCT
6. Design & education tools
7. Website vs EXE vs Android
8. Free limits & Pro
9. Trust rules & if stuck
10. URL cheat sheet

Not in this guide (on purpose)
Soft-unlaunched products (Implant Guidance, Mesh Studio / SmileCraft Pro, Tooth Shade Pro, Lip Norms Calculator) may exist on typed URLs for internal work. Do not promise them to patients or staff until they reappear on the public catalog.

ARCHITECTURE

1. One account, three surfaces

Odontheon is one identity (your email). You are not creating a separate login for every app.

Surface	What it is	When to use it
Hub OS	https://odontheon.com — choose Dentist mode	Discover apps, Continue into products, switch modes
Product hosts	book.odontheon.com, DentalCare, Finance, AI Core…	Day-to-day clinic work
Desktop EXE	Windows installers (Teach Me, Chairside Loop, CBCT, Cusp…)	Heavy local work; sign in with the same email

Rule of thumb
Patients book free. You subscribe for clinic software power (calendar tools, Suite apps). Public map listing policy follows verification and your Appointments subscription settings on the live booking host.

QUICK START

2. Five-minute dentist start

1. **Create your Odontheon account** on https://odontheon.com (Create account → Dentist) or on https://book.odontheon.com as Dentist. Same email everywhere.
2. **Open Appointments** at https://book.odontheon.com. Complete clinic onboarding (name, address, phone, map location).
3. **Ask for verification** if your clinic should appear in the public directory. Only verified clinics show to patients searching the map.
4. **Subscribe** when you need staff calendar tools / paid clinic features (Paddle checkout). Patients never pay Odontheon to book.
5. **Open DentalCare Pro** (chart of record) and optionally Finance from the hub Continue tiles or their direct hosts.

CLINIC BOOKING

3. Appointments — map, calendar, patients

Live host: `https://book.odontheon.com` (alias smile-sync-pi.vercel.app).

What patients can do

- Find verified clinics on the public map / list
- Get directions and see contact details you published
- Request / book visits (patient side is free)

What you do as dentist / staff

1. Sign in as Dentist → open your clinic dashboard.
2. Keep profile fields honest: address, phone, hours, tagline, map pin (lat/lng).
3. Manage schedule and incoming bookings from the staff app.
4. Use Subscribe / billing screens when your plan requires an active subscription for staff tools.

Visibility tip
Directory visibility is tied to clinic verification (and billing policy on the booking host). Keeping a pin without an active staff subscription can become unpaid advertising — treat Subscribe as part of being publicly bookable when that gate is enforced.

CLINIC RECORD & MONEY

4. DentalCare Pro & Odontheon Finance

DentalCare Pro

Chart of record — patients, visits, clinical workflow. Cloud app is the supported surface for most clinics.

https://odontheon-dentalcare.vercel.app

Odontheon Finance

Patient-linked ledger, aging, invoice preview. Complements DentalCare; not a payment clearinghouse.

https://odontheon-finance.vercel.app

1. Sign in with the same Odontheon email (Create account on those apps if needed — it syncs to the hub).
2. Prefer Continue from odontheon.com so SSO handoff can pass your session when enabled.
3. Subscribe via the in-app / Suite paths when prompted (Clinic Suite or individual plans).
4. Do not paste API keys into browser address bars or ask patients for staff passwords.

INTAKE & IMAGING

5. AI History Taking & CBCT Viewer

AI History Taking

Guided history / voice intake practice for clinic workflows. Free: 3 unique patients lifetime on device; re-open stays free; Pro unlimited.

https://odontheon.com/history-ai-voice/

CBCT Viewer

Local-first MPR + 3D viewer. DICOM stays on device. Free: 3 unique studies lifetime; re-open free; Pro unlimited. Viewer only — not implant planning guidance.

https://odontheon.com/cbct/

AI is draft-only

History drafts and suggestions never replace your diagnosis or consent conversation. Edit and accept responsibility before charting care.

DESIGN & TEACHING

6. Design & education tools dentists also use

Product	Best for	Open
Cusp Sculpt	Tooth sculpt / design workspace (free sculpt; Pro in-app)	https://odontheon.com/cusp-sculpting-pro/
Kephalo	Guided cephalometric tracing + PDF export	https://odontheon.com/cephalometry/
Odontheon AI Core	Hosted dental AI assistant (draft-only)	https://odontheon-ai-core.vercel.app
Dental Knowledge Wizard	Reference + MCQ study desk	https://odontheon.com/dental-knowledge-wizard/
Chairside Notes	Voice/typed study notes on device (not an EMR)	https://odontheon.com/dental-clinic-ak/

Product	Best for	Open
Teach Me	Desktop PDF tutor — EXE primary	Hub → Teach Me / Desktop download when listed
Chairside Loop	Desktop skill journal — EXE primary (2h free active use)	Hub → Chairside Loop / Desktop download when listed

INSTALLERS

7. Website vs EXE vs Android

- **Website / Continue** — fastest start; works on clinic PCs and phones for most products.
- **Windows EXE** — use when the product is desktop-primary (Teach Me, Chairside Loop) or you need local files (CBCT). Download only from Odontheon Download / Software when an HTTPS installer URL is published. Unsigned builds may show SmartScreen — that is expected for early releases.
- **Android TWAs** — optional full-screen wrappers for selected products; same web account. Install only from Odontheon when APK/Play links are published.

Honest downloads
If a download button is missing, the public installer URL is not published yet. Prefer the live web mount rather than third-party mirrors.

BILLING

8. Free limits & Pro (dentist-relevant)

Product	Free	Pro / Suite
Appointments (patients)	Always free to book	Staff tools via subscription when required
AI History Taking	3 unique patients / life	Unlimited
CBCT Viewer	3 unique studies / life	Unlimited
Kephalo	3 unique analyses / life	Unlimited
Teach Me	3 lifetime imports	Unlimited imports
Chairside Loop	2 hours lifetime active use	Pro / Suite unlock
DentalCare / Finance	Trial / gated by plan	Individual or Clinic Suite

Re-opening the same free case usually does not consume another slot. Checkout runs through Paddle as Merchant of Record.

SAFETY

9. Trust rules & if stuck

- Clinical decisions stay with the dentist. AI drafts are suggestions.
- Do not upload patient DICOM to random cloud tools — CBCT is local-first by design.
- Chairside Notes is study notes, not the chart of record (DentalCare Pro is).
- Help: https://odontheon.com/help/ · Contact: https://odontheon.com/contact/ · Trust: https://odontheon.com/trust/

REFERENCE

10. URL cheat sheet

Need	URL
