What this guide covers

1. What Odontheon is (for you)
2. Create your free account
3. Find clinics on the map
4. Directions, phone, booking
5. After you book
6. Chompville (kids)
7. What you never need to buy
8. Privacy & safety
9. If something goes wrong
10. URL cheat sheet

One sentence promise
Patients use Odontheon for free to find and book clinics. Clinic software subscriptions are for dentists — not for you.

BASICS

1. What Odontheon is (for you)

Odontheon is a dental platform. As a patient you mainly use:

- **Book a Visit / Appointments** — map of verified clinics + booking
- **Odontheon hub** — optional home at odontheon.com (choose Patient mode)
- **Chompville** — friendly kids education game (optional)

You do **not** need DentalCare Pro, Finance, CBCT, or clinic EXEs. Those are for dental professionals.

ACCOUNT

2. Create your free account

1. Open **https://book.odontheon.com** (or https://odontheon.com → Create account → Patient).
2. Choose **Patient** (not Dentist).
3. Use a real email you can open — this is your Odontheon login everywhere.
4. Confirm / sign in. Keep the password private; clinics will not ask Odontheon for it.

Same email forever
One person → one Odontheon email. You should not create a second "patient account" for every clinic app.

DISCOVER

3. Find clinics on the map

1. Go to Appointments: `https://book.odontheon.com`
2. Open the public clinics map or list.
3. Only **verified** clinics appear in the public directory.

4. Tap / click a pin or clinic card to open details.

You will usually see

Clinic name, address, phone, website (if provided), and a short description.

You will not see

Hidden / unverified clinics, or soft-preview products that dentists use privately.

CONNECT

4. Directions, phone, and booking

Get directions

1. Open a clinic pin or clinic page.
2. Choose **Get directions** (opens Google Maps with that location when coordinates exist).
3. Travel with the map app on your phone as usual.

Call or contact

- Use the phone number shown on the clinic page when you need to speak to the front desk.
- Email / website links appear only if the clinic published them.

Book online

1. From the clinic page, start a booking / visit request.
2. Enter the details the clinic asks for (date preference, reason, contact).
3. Submit. Wait for clinic confirmation through the Appointments flow or their follow-up.

If online booking is unavailable

Some clinics may temporarily pause online requests. You can still use the phone number / directions when those details are shown — or pick another verified clinic.

VISIT DAY

5. After you book

- Arrive on time with any documents the clinic requested.
- Treatment decisions are made by your dentist — Odontheon does not diagnose you.
- Fees for dental treatment are between you and the clinic (not an Odontheon patient subscription).
- If you need to change or cancel, contact the clinic early using the number on their page.

KIDS

6. Chompville (optional)

Chompville is a child-friendly dental education experience on Odontheon.

- Open: `https://odontheon.com/dental-kids/`
- Also available from the hub in Patient / Education areas when listed.
- It is for learning and engagement — not a medical diagnosis tool.

MONEY

7. What you never need to buy from Odontheon

Item	Patient?
Creating an account	**Free**
Finding clinics / map / directions	**Free**
Booking a visit through Appointments	**Free** (to Odontheon)
Clinic Suite / DentalCare / Finance Pro	For dentists — ignore these checkouts
Windows clinic EXEs	Not for patients

Watch for the wrong checkout

If a page asks you to subscribe as a dentist or buy Clinic Suite, you are on a staff product. Go back to Book a Visit as Patient.

TRUST

8. Privacy & safety

- Share only the health details needed to book and be treated.
- Prefer official links: odontheon.com and book.odontheon.com.
- Odontheon AI tools for professionals are draft helpers — patients should not use staff AI products as medical advice.
- Read https://odontheon.com/privacy/ and https://odontheon.com/trust/ for platform policies.

SUPPORT

9. If something goes wrong

- **Cannot sign in** — reset password / check you chose Patient, not Dentist.
- **Clinic missing** — it may be unverified or not listed yet; try phone search or another clinic.
- **Booking failed** — retry once; then call the clinic with the number on their page.
- **Help pages** — https://odontheon.com/help/ · Contact — https://odontheon.com/contact/
