Odontheon

Dental technology by Dr. Muhammad Asad Khan, BDS

STUDENT / EDUCATION GUIDE

Learn dentistry with real tools — not toy demos

How to study with Teach Me, Kephalo, Chairside Loop, Knowledge Wizard, Cusp Sculpt, CBCT Viewer, and AI Core — including free limits, EXEs, and what not to confuse with a clinic EMR.

AUDIENCE
Dental students & educators

What this guide covers

1. Student mode vs dentist tools
2. Five-minute study desk
3. Teach Me (EXE)
4. Kephalo tracing
5. Chairside Loop (EXE)
6. Notes, Wizard, Cusp, CBCT, AI
7. Free limits explained
8. Website vs desktop
9. Study ethics & trust
10. URL cheat sheet

Not clinic software
Education apps are for learning. The chart of record for real patients is DentalCare Pro (dentist tools). Do not treat Chairside Notes or AI chats as an EMR.

IDENTITY

1. Student mode vs dentist tools

On https://odontheon.com, choose **Student** as your hub OS mode. That steers you toward Education / Teaching products.

Use as student	Usually leave for clinics
Teach Me, Kephalo, Chairside Loop, Knowledge Wizard, Chairside Notes, Cusp Sculpt, CBCT Viewer, AI Core, Chompville	DentalCare Pro charting, Finance ledgers, Appointments staff calendar (unless you are also staffing a clinic)

One Odontheon email still covers everything if you later become a dentist user — modes change; identity does not.

QUICK START

2. Five-minute study desk

1. Create account on https://odontheon.com → choose **Student**.
2. Open **Kephalo** and complete one guided tracing (counts as one free analysis).
3. Open **Dental Knowledge Wizard** and try an MCQ / article for your topic.
4. If you have lecture PDFs, install **Teach Me** desktop when the HTTPS download is listed — or open the web companion from Continue.
5. Read Free limits (section 7) so you do not burn unique slots by accident.

DESKTOP TUTOR

3. Teach Me (EXE primary)

Teach Me turns study PDFs into a desktop tutor workflow (OCR / large scans). Odontheon sign-in required.

1. Prefer the Windows installer from Odontheon Download / Software when published (HTTPS URL).
2. Sign in with your Odontheon email.
3. Import a PDF. Free tier: **3 lifetime imports** (re-import counts; books you already imported stay).
4. Upgrade to Pro / Suite when you need unlimited imports.

Web note
Cloud /teach-me may be limited; desktop is the intended product surface. Unsigned installers can trigger Windows SmartScreen.

CEPHALOMETRICS

4. Kephalo — guided lateral tracing

Open: `https://odontheon.com/cephalometry/`

1. Upload a lateral cephalometric image (practice / teaching material you are allowed to use).
2. Place landmarks following the guided steps.
3. Calibrate millimetres when prompted so angles/distances make sense.
4. Review results; use Pencil / Eraser for teaching mark-up when available.
5. Export PDF for your portfolio or supervisor review.

Free limit
3 unique analyses lifetime on the device; re-open the same analysis free. Pro removes the ceiling.

Deeper walkthrough: https://odontheon.com/guides/kephalo-tracing/

SKILL JOURNAL

5. Chairside Loop (EXE primary)

Desktop skill journal for typodont / practice logs, Browse, and literature import helpers. Educational — not an EMR.

- Web companion: https://odontheon.com/dental-measurements/
- Free: **2 hours lifetime active use** per account, then Pro / Suite.
- Sign in with Odontheon on desktop. Download only when the official HTTPS installer is listed.

MORE EDUCATION APPS

6. Notes, Wizard, Cusp, CBCT, AI Core

App	How students use it	Open
Chairside Notes	Voice/typed study notes in the browser (localStorage). Ads-supported education — not patient charts.	https://odontheon.com/dental-clinic-ak/
Dental Knowledge Wizard	Articles + MCQs for revision.	https://odontheon.com/dental-knowledge-wizard/
Cusp Sculpt	Practice tooth anatomy / sculpt. Free sculpt; Pro unlocks in-app.	https://odontheon.com/cusp-sculpting-pro/
CBCT Viewer	Learn MPR/3D on local studies. 3 unique studies free; DICOM stays on device.	https://odontheon.com/cbct/
Odontheon AI Core	Ask study questions; treat answers as drafts to verify against textbooks/faculty.	https://odontheon-ai-core.vercel.app
Chompville	Patient-education style learning (also useful for pediatric rotations).	https://odontheon.com/dental-kids/

FREEMIUM

7. Free limits explained

Many tools give a lifetime allowance of **unique** items on your device. Opening the same item again is designed to stay free.

Product	Free lifetime	Pro changes
Kephalo	3 unique analyses	Unlimited
CBCT Viewer	3 unique studies	Unlimited
Teach Me	3 imports	Unlimited imports
Chairside Loop	2h active use	Pro / Suite
AI History Taking	3 patients (clinic practice tool)	Unlimited
Knowledge Wizard / Chairside Notes	Feature-complete education (ads where configured)	No Pro SKU required for core study use

More detail: https://odontheon.com/guides/free-limits/ · Pricing: https://odontheon.com/pricing/

INSTALLERS

8. Website vs desktop

- **Start on the website** for Kephalo, Wizard, Notes, Cusp, CBCT web, AI Core.
- **Prefer EXE** for Teach Me and Chairside Loop when you need the full desktop product.
- Never download Odontheon installers from random file hosts. If the official button is missing, the public URL is not published yet.
- SmartScreen warnings can appear on unsigned early Windows builds — confirm the publisher path is Odontheon.

INTEGRITY

9. Study ethics & trust

- Use only images/PDFs you have rights to use for study.
- Do not paste identifiable patient data into public AI chats.
- AI Core answers are draft-only — cross-check with faculty and primary literature.
- Soft-unlaunched research tools may exist on private URLs; they are omitted here until public launch.
- Trust hub: https://odontheon.com/trust/ · AI draft policy: https://odontheon.com/guides/ai-draft-only/

REFERENCE

10. URL cheat sheet
